Dear Potential Contributor,

At Fallon Contracting and Consulting we strive to protect the world we live in by prioritizing green building and construction. We believe that, as people, we share the world we live in, not only with each other, but with the wildlife and vegetation that consumes our natural habitats and we want to do our part to conserve the environment by all means necessary!

We need your help to continue pursuing our mission, that's why we'd like you to consider contributing to our cause, because our cause is protecting the environment, one community at a time. While we are making great strides in our efforts to conserve our environment, protect the wildlife where we build, recycle our materials and ensure proper waste disposal, down to your very community or neighborhood, we still have miles and miles to go!

One of the first things your financial contribution will go towards is educational scholarships for extraordinary contractors hungry to pursue their education to focus on our overall mission, environmental conservation in construction! The next next thing that your contributions will go to is the ongoing higher education of civil engineering, architecture, construction, and renewable energy. We want to be able to expand into wind and solar energy and with your contribution we can research and hire the most qualified applicants for these fields which provides our clients with more services and more opportunities to extend our reach nationwide. We hope to expand into Illinois, Michigan and Wisconsin by the end of this year so we can service more clients and customers who can benefit from energy efficient inspections, and many of our other services.

We take construction extremely serious because the way we recycle building materials and waste, the way we promote green building, the way we are dedicated to a higher level of education for our professionals to service our clients, and the way we are on a mission to create renewable energy projects and research is every reason why your contribution will not only help those who we provide our services for but also for hundreds who need employment, and thousands who need extreme home repairs and renovations.

For every contribution we receive a percentage will help us host a monthly Fallon Contracting and Consulting CARES project, where we find one person in the community to provide a free home repair service to those who are not financially or physically capable. It allows us to give back to the community and utilize leftover building materials that would have otherwise been demolished. We will be posting these projects on our social media pages and website so that you can stay up to date with our initiatives and how your support can make a difference nationwide!

Sincerely,

Nicole Burtchell
CEO & FOUNDER
